

VISION CARE PLUS FRAME PRICING AND PROGRAM OPTIONS

**Vision Care
PLUS**

The BASE PRICE includes polycarbonate or plastic lenses, frames, clip-on or permanent side shields, case, fittings, and basic delivery charges.

Glasses comply with ANSI Z-87.2 Safety Standards

Wrap frame orders will incur an upcharge if prescription parameters are not met.

PROGRAM OPTIONS

OPTION 1 - On-Site Program:

Eagle Safety schedules a certified optician to visit your facility for regularly scheduled appointments, or on an "as-needed basis" to fit and dispense prescription safety glasses. The on-site optician carries a large selection of frames and is able to collect employee co-pays. This optician will also insure that all orders are within program guidelines and will maintain all records relevant to the program. There are no charges as long as a minimum of 20 pairs are ordered within driving distance for the optician, or 50 pairs per fitting that incurs travel by plane. Should these numbers not be met, a fee of \$50 per hour and \$100 per hour respectively will be added.

OPTION 2 - Fitting Center:

Eagle Safety will establish local providers in your area to help with fitting and dispensing of safety eyeglasses. A local provider usually consists of a doctors' office that provides fitting and dispensing, as well as eye exams if needed. This eye care provider will have a selection of approved ANSI compliant safety frames from which to choose. The employee brings a current prescription and the customized order form outlining program guidelines during their fitting appointment. The participating local provider will fill out the form and forward it to Eagle Safety to process the eyeglasses, who will return the completed eyewear back to the local provider to be dispensed. The local provider then contacts the employee to schedule a pickup of their safety eyeglasses.

OPTION 3 - Mail Order, Online and Fax Programs:

The employee schedules an eye exam with their own eye doctor, bringing with them a customized order form outlining the program guidelines and frame options. The doctor's office or optical shop will fill out the form. The employee returns the form by fax or e-mail to Eagle Safety for processing. After the order is processed, the eyeglasses are shipped either to the employee's home, the administrator at the plant, or to their own eye care provider.
